

Coconut Sugar Bio 30x10 g Sticks Superfoods Drasanvi

SKU: 032010038 EAN13: 8436044518287

Description

Coconut sugar is obtained from the nectar of the flowers that grow on coconut trees. This substance has been commonly used in Asian countries since ancient times. In recent years the use of coconut sugar has become increasingly popular, due to its low glycaemic index that does not alter in excess blood sugar levels and its delicious caramel-like flavour. Coconut sugar is an organic sugar: it is produced and processed sustainably and is thought to be one of the world's most environmentally friendly and sustainable sugars.

Ingredients

Organic coconut sugar (*Cocos nucifera L.*)

Directions

Presentation

Contains 30 sticks of 10g. Net weight 300
g (10.58 oz)

Warnings

Store in a cool, dry place.

Additional Information

Indonesian origin

Coconut sugar has been commonly used in Asian countries since ancient times. Drasanvi has chosen to source it in Indonesia due to its long tradition there as well as the high quality of the raw materials used and their extraction methods that respect both the plant itself and the environment.

Organic certification

We meet the highest quality standards during the collection and processing of the coconut sugar we use, which has led it to become a certified organic product. Coconut sugar is considered the world's most environmentally friendly sugar.

Delicious flavour and exquisite taste

Coconut sugar is not only characterized by its properties, but also has an unmistakable flavour, contributing to your desserts and dishes a touch of caramel, very different from that provided by other sugars and sweeteners.
