

Propolis Balsamic Syrup 250 ml Drasanvi

SKU: 032050017 EAN13: 8437006921275

Description

Propolis Balsamic Syrup is a food supplement rich in vegetable extracts and propolis. The vegetable extracts we use include: Red Poppy, Great Mullein, Common Marsh Mallow, Dwarf Everlast, Thyme, Pine and Fennel. We have used propolis of the highest quality. Propolis is a resinous mixture that bees make from resinous compounds of plants. Propolis is made up of resins, balsams, essential oils and other organic matter, in particular flavonoids such as quercetin and galangin. Propolis Balsam Syrup comes with a dosage cup, which allows you to measure your dose accurately and drink it directly.

Ingredients

Water , Sweetener (*Corn syrup*) , Propolis Liquid Extract (*Galangine 8%*) 160 mg, Glycerine , Common Marsh Mallow liquid extract (*Althaea officinalis L.*) 100 mg, Lime liquid extract (*Tilia cordata*) 60 mg, Red Poppy liquid extract (*Papaver rhoeas L.*) 50 mg, Great Mullein liquid extract (*Verbascum thapsus L.*) 40 mg, Preservative (*Potassium sorbate*) , Acid (*Citric Acid*) , Echinacea fluid extract (*Echinacea angustifolia DC*) 40 mg, Dwarf Everlast dry extract (*Helichrysum arenarium (L) Moench, ratio 4:1*) 40 mg, Pure pine essential oil (*Pinus sylvestris*) 20 mg, Pure thyme essential oil (*Thymus vulgaris L.*) 7 mg, Pure fennel essential oil (*Foeniculum vulgare Miller*) 3,04 mg

Directions

Shake well before use. Take 10 ml in the morning and 10 ml in the evening.

Presentation

Contains 250 ml (8 fl oz)

Warnings

Food supplements should not be used as a substitute for a balanced diet. Do not exceed the expressly recommended daily dose. Keep out of the reach of younger children. Store in a cool, dry place.

Additional Information

Propolis of the highest quality

Propolis is a resinous mixture created by bees to keep their hives sterile. This ingredient contains many valuable properties, which depend on the quality of the propolis itself. Its quality depends on the source, the extraction process and its correct preservation. Drasanvi has used the highest quality of ingredients for its entire Propolis range, especially when it comes to the ingredient propolis itself.

- Un-waxed propolis, i.e. we have removed the wax to get a purer form, richer in active ingredients.
- Standardised propolis, i.e. this guarantees the high and uniform quality of the active ingredients (including galangin). We can guarantee the quality of the product and the uniformity of each

batch for its entire shelf life.

The synergies between vegetable extracts and essential oils

Propolis balsam syrup contains vegetable extracts and essential oils. Essential oils are a mixture of various chemicals, biosynthesised by plants, that give the characteristic aromas of certain flowers, trees, fruits, herbs, spices and seeds. Plants create these essential oils to protect themselves from disease, to keep away insects and predators or to attract those insects that will help them pollinate. The oils we used are 100% pure and come from natural sources.

Corn syrup

Excess sugars in foods are an increasing problem, and nowadays people try to reduce their intake of sugar and replace it with sucrose. corn syrup contains less glucose, thereby reducing the ability to form sucrose.
