Additional Information

Complimentary effects of echinacea purpurea and echinacea angustifolia

Drasanvi's Echinacea Forte combines two different types of echinacea, purpurea and angustifolia. These two different species of the same flower have different active ingredients, namely polyphenols, cichoric acid and echinacea, and that is why we use two different types.

Standardised polyphenol vegetable extracts

We use standardised extracts so that we can guarantee the uniformity of each batch for its entire shelf life. Drasanvi's Echinacea Forte contains 4% polyphenols, 2% cichoric acid and 4% echinacea.

High concentration

Drasanvi's Echinacea Forte is made up of extracts, i.e. of substances that are more concentrated than just their powdered form. In this particular case, the echinacea extract is five times more powerful than echinacea powder. Therefore:

- 101.66mg of EQUINACEA PURPUREA EXTRACT === 508.3mg of POWDER

- 100 mg of EQUINACEA ANGUSTIFOLIA EXTRACT === 500mg of POWDER
- TOTAL AMOUNT PER CAPSULE: 1008.3mg

Vegetable capsules

Drasanvi's Echinacea Forte capsules are vegetable based and are suitable for vegetarians and vegans.
