Omepur 3 45 Softgels Drasanvi

SKU: 032050029 **EAN13:** 8437006921497

Description

Omepur 3® is a food supplement rich in omega 3 amino acids, in particular in DHA and EPA. Itcontains these substances in high purity levels, so that each softgel contains a high concentration ofomega 3 (480 mg of EPA, 340 mg of DHA, 180 mg of other types of omega 3). These substances haveimportant properties: DHA helps maintain good vision and brain in normal conditions. EPA and DHAtogether help the heart function normally. The fish oils are extracted from anchovies and sardines fromthe Indian Ocean, guaranteing a clean, slightly contaminated environment. Apart from the high qualityof the oils used, we have also used cutting-edge technology for this supplement, specially for thecasing. It is gastro-resistant, i.e. the softgel is able to pass through the gastric wall and go straight intothe intestine.

Additional Information

The source of the oil

The source of the oil that is used in Omepur 3® comes from wild sardines and anchovies from the Indian Ocean. These species absorb less metal than other larger species. We guarantee that the oils we use are metal-free on each batch that we produce.

High quantities of EPA and DHA

Our new super critical fluid extraction system ensures that we get a high concentration of EPA and DHA.
