

# Omepur 3 45 Softgels Drasanvi

SKU: 032050029 EAN13: 8437006921497

## Description

Omepur 3<sup>®</sup> is a food supplement rich in omega 3 amino acids, in particular in DHA and EPA. It contains these substances in high purity levels, so that each softgel contains a high concentration of omega 3 (480 mg of EPA, 340 mg of DHA, 180 mg of other types of omega 3). These substances have important properties: DHA helps maintain good vision and brain in normal conditions. EPA and DHA together help the heart function normally. The fish oils are extracted from anchovies and sardines from the Indian Ocean, guaranteeing a clean, slightly contaminated environment. Apart from the high quality of the oils used, we have also used cutting-edge technology for this supplement, specially for the casing. It is gastro-resistant, i.e. the softgel is able to pass through the gastric wall and go straight into the intestine.

## Ingredients

---

**Concentrated fish oils** (*Contains fish*) (*Contains crustaceans*) (48% EPA, 34% DHA, Another Omega 3 18%) 1000 mg, **Casing** (*Contains Soya*) (*Gelatin, Glycerin, Sorbitol*) , Vitamin E (*Tocopheryl acetate*) 0,4 mg

## Warnings

---

Food supplement based on fish oil and vitamin E.

Food supplements should not be used as a substitute for a balanced diet. Do not exceed the expressly recommended daily dose. Keep out of the reach of younger children. Store in a cool, dry place.

## Additional Information

---

### The source of the oil

The source of the oil that is used in Omepur 3<sup>®</sup> comes from wild sardines and anchovies from the

Indian Ocean. These species absorb less metal than other larger species. We guarantee that the oils we use are metal-free on each batch that we produce.

**Gastro-resistant softgels**

The Omepur 3® softgels have a special casing that can pass through the gastric wall and go straight into the intestine, where it is absorbed. This innovative system means you can digest this product easily without the taste associated with fish oil softgels.

**High quantities of EPA and DHA**

Our new super critical fluid extraction system ensures that we get a high concentration of EPA and DHA.
