

Folic Acid 30 Capsules Nutrabasics Drasanvi

SKU: 032050039 EAN13: 8436044513763

Description

Folic acid is a vitamin belonging to the B group, also known as vitamin B9. The functions of this vitamin, according to the European Sport & Fitness Academy (ESFA) are:

- Contributing to the growth of maternal tissues during pregnancy.
- Contributing to the healthy synthesis of amino acids.
- Contributing to the healthy formation of blood cells.
- Contributing to maintaining a psychological balance.

- Contributing to the healthy functioning of the immune system.
- Helping reduce tiredness and fatigue.
- Aiding the cell division process.

Sources for folic acid include organ meats, green vegetables, yeast, dried fruits and nuts. Our Drasanvi capsules provide 400 µg of folic acid in the form of pteroyl-L-glutamic acid. Each capsule provides 100% of the recommended daily allowance.

Ingredients

Bulking agent (*Microcrystalline cellulose*) , Casing (*Hydroxypropyl Methylcellulose*) , Bulking agent (*Magnesium salt of fatty acid*) , Anti-caking agent (*Silicon dioxide*) , Folic acid (*Pteroyl-L-glutamic acid*) 0,4 mg

Food supplements should not be used as a substitute for a varied and balanced diet and a healthy lifestyle. Do not exceed the expressly recommended daily dose. Keep out of the reach of little kids. Store in a cool, dry place.

Additional Information

Concentrated dose, easy to take

We look for ingredients that are easy to take, providing the recommended daily allowance in just one

dose.

Vegetable-based capsules

The capsules we use are vegetable-based, made from hydroxypropyl methylcellulose, and have been certified by the Vegetarian Society. Hydroxypropyl methylcellulose is obtained from the cellulose found in various plant structures.

Free from allergens

We have ensured that our folic acid capsules have not come into contact with the most common allergens, in particular with gluten.

Blister packs

Our folic acid capsules come in blister packs: they protect the contents from any knocks as well as from environmental factors, ensuring that the product remains intact for as long as possible. This type of packaging is the best for protection against humidity and microbial contamination.
