

Korean Ginseng 60 Capsules Nutrabisics Drasanvi

SKU: 032050127 EAN13: 8436044514074

Description

Korean ginseng is a plant from which the root is used. The roots need more years of growth to concentrate a greater amount of active principle. Korean ginseng helps support energy, vitality, and mental well-being. Once the optimum maturity for harvesting has been reached (which can take several years), the ginseng root is uprooted to subsequently remove the remains of soil. Afterwards, it is heated to remove the integuments and proceed to the extraction of active ingredients.

Ingredients

Ginseng Dry Extract (Root) (*Panax ginseng* C.A. Meyer, Ratio 3:1, Ginsenosides 4%) 600 mg, Bulking Agent (Hydroxypropyl Methylcellulose), Casing (Microcrystalline Cellulose), Bulking Agent (Magnesium salt of fatty acid), Anti-Caking Agent (Silicon Dioxide)

Directions

Take two (2) capsules per day, distributed in the main meals.

Presentation

Contains 60 capsules, 546 mg each. Total weight: 32,76 g (1.15 oz).

Warnings

Food supplement based on plants.

Food supplements should not be used as a substitute for a balanced diet. Do not exceed the expressly recommended daily dose. Keep out of the reach of younger children. Store in a cool, dry place.

Additional Information

Dry extracts

Our Korean Ginseng capsules contain dry extracts instead of powdered plant material. Dry extracts are more concentrated and therefore, the same results can be achieved by using less product. We have selected a Korean Ginseng Extract with a 3:1 ratio. This means that we have used 1.800 mg of plant to produce 600 mg of extract. "Dry extract" refers to a specific extraction process that retains the bioactive compounds from plant materials and eliminates impurities and other unnecessary substances. The use of plant extracts has several advantages over the use of powdered forms:

- The bioactive compounds content can be accurately measured (Standardized Extracts).
- Products based on plant extracts are more concentrated than those made from powdered plant material (Concentrated and easy to take doses).

- The assimilation of bioactive compounds is easier if they are alone (extract form) rather than in combination with the rest of plant material that retains impurities and fiber (powdered form).

Standardized extracts

Another important advantage of our product formulation is the use of standardized extracts. Standardized extracts contain isolated, guaranteed amounts of bioactive ingredients that remain constant over time. In this particular case, our Korean Ginseng Extract is titrated in Ginsenosides, ensuring a constant daily dose of 24 mg.

Concentrated and easy to take doses

The use of concentrated and titrated dry extracts allows us to provide the same dose in just two (2) capsules.

Vegetable capsules

Our capsules are vegetable-based. They are manufactured from Hydroxypropyl Methylcellulose, which is a product derived from plant cellulose. These capsules have been certified by the Vegetarian Society.

Allergen-free

We make every effort to ensure that our Korean Ginseng capsules are free of the most common allergens, in particular gluten.

Blister packs

Our Korean Ginseng capsules come in blister packs. Blister packs protect products against adverse external influences that may affect its quality or potency (such as mechanical damage and environmental factors like moisture or biological contamination), ensuring their composition for extended periods of time.
