

Devil's Claw 60 Capsules Nutrabisics Drasanvi

SKU: 032050128 EAN13: 8436044514081

Description

Devil's Claw (*Harpagophytum procumbens*) is a plant with dentate leaves and deep roots that gets its name from the appearance of its fruit, which is covered with hooks meant to attach onto animals fur. Its properties have been known by many civilizations, including the Bushmen that have used the plant for hundreds of years. In 1960 it arrived to Europe, where it has been widely used ever since.

Ingredients

Devil's Claw Dry Extract (*Harpagophytum procumbens* DC (Ratio 5:1) Providing Harpagosides (5%))
600 mg, Bulking Agent (*Hydroxypropyl Methylcellulose*), Casing (*Microcrystalline Cellulose*), Bulking
Agent (*Magnesium salt of fatty acid*), Anti-Caking Agent (*Silicon Dioxide*)

Directions

Take two (2) capsules daily, one (1) in the morning
and one (1) at dinner time.

Presentation

Contains 60 capsules, 466 mg each. Total
weight: 28 g (0.99 oz).

Warnings

Food supplement based on plants.

Food supplements should not be used as a substitute for a balanced diet. Do not exceed the expressly
recommended daily dose. Keep out of the reach of younger children. Store in a cool, dry place.

Additional Information

Dry extracts

Our Devil's Claw capsules contain dry extracts instead of powdered plant material. Dry extracts are
more concentrated and therefore, the same results can be achieved by using less product. We have
selected a Devil's Claw Extract with a 5:1 ratio. This means that we have used 3.000 mg of plant to
produce 600 mg of extract. "Dry extract" refers to a specific extraction process that retains the bioactive
compounds from plant materials and eliminates impurities and other unnecessary substances. The use
of plant extracts has several advantages over the use of powdered forms:

- The bioactive compounds content can be accurately measured (Standardized Extracts).
- Products based on plant extracts are more concentrated than those made from powdered plant
material (Concentrated and easy to take doses).

- The assimilation of bioactive compounds is easier if they are alone (extract form) rather than in combination with the rest of plant material that retains impurities and fiber (powdered form).

Standardised extracts

Another important advantage of our product formulation is the use of standardised extracts. Standardised extracts contain isolated, guaranteed amounts of bioactive ingredients that remain constant over time. In this particular case, our Devil's Claw Extract is titrated in Harpagosides, ensuring a constant daily dose of 30 mg.

Concentrated and easy to take doses

The use of concentrated and titrated dry extracts allows us to provide the same dose in just one (1) capsule.

Vegetable capsules

Our capsules are vegetable-based. They are manufactured from Hydroxypropyl Methylcellulose, which is a product derived from plant cellulose. These capsules have been certified by the Vegetarian Society.

Allergen-free

We make every effort to ensure that our Devil's Claw capsules are free of the most common allergens, in particular gluten.

Blister packs

Our Devil's claw capsules come in blister packs. Blister packs protect products against adverse external influences that may affect its quality or potency (such as mechanical damage and environmental factors like moisture or biological contamination), ensuring their composition for extended periods of time.
