

Passionflower 30 Capsules Nutrabisics Drasanvi

SKU: 032050134 EAN13: 8436044513954

Description

The passion flower plant is instantly recognisable due to its very striking flower and to the presence of its fruit, the passion fruit. The plant is also known as maypop or Passiflora. Passion flower has been widely used to treat nervousness and insomnia. Some parts of the flower are rich in active ingredients such as flavonoids, phenols and essential oils.

Ingredients

Passion flower dry extract (*Flowering tops*) (*Passiflora incarnata L. Ratio 4:1 3,5% Vitexin*) 350 mg, Casing (*Hydroxypropyl Methylcellulose*), Bulking agent (*Microcrystalline cellulose*), Bulking agent (*Magnesium salt of fatty acid*), Anti-caking agent (*Silicon dioxide*)

Directions

Take one capsule a day. We recommend taking the capsule one hour before going to bed.

Presentation

Contains 30 capsules, 491 mg each. Total weight: 14,75 g (0.50 oz)

Warnings

Food supplement based on plants.

Food supplements should not be used as a substitute for a balanced diet. Do not exceed the expressly recommended daily dose. Keep out of the reach of younger children. Store in a cool, dry place.

Additional Information

The use of dry extract

We use dry plant extract instead of powdered plant extract in our passion flower capsules. This allows us to concentrate the product, giving exactly the same results just using less of it. For this product we have chosen passion flower extract with a ratio of 4:1, which means that we have used 1400 mg of the plant to obtain 350 mg of the extract. "Dry extract" refers to a specific extraction process, during which the active ingredients are retained, while the impurities and other substances that are not needed are removed. The use of plant extracts has a number of advantages over vegetable-based and powdered forms:

1. It is possible to measure the exact amount of active ingredients (standardised extracts)
2. Products based on plant extract are more concentrated than those made from powdered form (a concentrated dose is easy to take)

3. The assimilation of the active ingredients alone is easier than the assimilation of all of the compounds of the plant because impurities and fibres are present in the powder.

Standardised extracts

Another important advantage of our product is the use of standardised extract, i.e. the provision of active plant ingredients remains constant over time. In the case of passion flower, this extract is vitexin and it provides you with 12.25 mg per daily dose.

Concentrated dose, easy to take

The use of concentrated dry extract and active ingredients allows us to provide the same dose in just one capsule.

Vegetable-based capsules

The capsules we use are vegetable-based, made from hydroxypropyl methylcellulose, and have been certified by the Vegetarian Society. Hydroxypropyl methylcellulose is obtained from the cellulose found in various plant structures.

Free from allergens

We have ensured that our passion flower capsules have not come into contact with the most common allergens, in particular with gluten.

Blister packs

Our passion flower capsules come in blister packs: they protect the contents from any knocks as well as from environmental factors, ensuring that the product remains intact for as long as possible. This type of packaging is the best for protection against humidity and microbial contamination.
