

Ginger 30 Capsules Nutr basics Drasanvi

SKU: 032050136 EAN13: 8436044513916

Description

Ginger is a root that grows in subtropical countries. It has a powerful aroma and a number of important properties, such as:

- Supporting the immune system
- Suppressing nausea and travel sickness.
- Contributing to the normal functioning of intestinal tract
- Helping reduce tiredness and fatigue.

Ingredients

Ginger dry extract (*Rhizome*) (*Zingiber officinale* Roscoe, Ratio 8:1 5% gingerol) 330 mg, Casing (*Hydroxypropyl Methylcellulose*) , Bulking agent (*Microcrystalline cellulose*) , Bulking agent (*Magnesium salt of fatty acid*) , Anti-caking agent (*Silicon dioxide*)

Directions

Take one capsule daily with one of your main meals.

Presentation

Contains 30 capsules, 481 mg each. Total weight: 14,45 g (0.51 oz)

Warnings

Food supplement based on plants.

Food supplements should not be used as a substitute for a balanced diet. Do not exceed the expressly recommended daily dose. Keep out of the reach of younger children. Store in a cool, dry place.

Additional Information

The use of dry extract

We use dry plant extract instead of powdered plant extract in our ginger capsules. This allows us to concentrate the product, giving exactly the same results just using less of it. For this product we have chosen ginger extract with a ratio of 8:1, which means that we have used 2640 mg of the plant to obtain 330 mg of the extract. "Dry extract" refers to a specific extraction process, during which the active ingredients are retained, while the impurities and other substances that are not needed are removed. The use of plant extracts has a number of advantages over vegetable-based and powdered forms:

- It is possible to measure the exact amount of active ingredients (standardised extracts)
- Products based on plant extract are more concentrated than those made from powdered form (a concentrated dose is easy to take).

- The assimilation of the active ingredients alone is easier than the assimilation of all of the compounds of the plant because there are impurities and fibres present in the powder.

Standardised extracts

Another important advantage of our product is the use of standardised extract, i.e. the provision of active plant ingredients remains constant over time. In the case of ginger, this extract is gingerol and it provides you with 16.5 mg per daily dose.

Concentrated dose, easy to take

The use of concentrated dry extract and active ingredients allows us to provide the same dose in just one capsule.

Vegetable-based capsules

The capsules we use are vegetable-based, made from hydroxypropyl methylcellulose, and have been certified by the Vegetarian Society. Hydroxypropyl methylcellulose is obtained from the cellulose found in various plant structures.

Free from allergens

We have ensured that our ginger capsules have not come into contact with the most common allergens, in particular with gluten.

Blister packs

Our ginger capsules come in blister packs: they protect the contents from any knocks as well as from environmental factors, ensuring that the product remains intact for as long as possible. This type of packaging is the best for protection against humidity and microbial contamination.
