

Chondroitin and Glucosamine 48 Capsules Nutrabasics Drasanvi

SKU: 032050147 EAN13: 8436044514111

Description

Chondroitin and Glucosamine are two widely known and used food supplements. Chondroitin, also known as Chondroitin Sulfate, is generally found attached to proteins, as part of high molecular weight aggregates denominated Proteoglycans (one of the two main components of articular cartilage). Our Chondroitin is obtained from shark cartilage. **Glucosamine Sulfate**, also known as Glucosamine, is an amino sugar and a prominent precursor in the synthesis of glycosylated proteins and lipids such as Glycosaminoglycans, Glycolipids and Proteoglycans (one of the two main components of articular cartilage). Our Glucosamine is Glucosamine HCL.

Ingredients

D-Glucosamine HCL (*Contains crustaceans*) 1.000 mg, **Chondroitin Sulfate** (*Contains fish*) 400 mg, Casing (*Hydroxypropyl Methylcellulose*) , Bulking Agent (*Microcrystalline Cellulose*) , Bulking Agent (*Magnesium salt of fatty acid*) , Anti-Caking Agent (*Silicon Dioxide*)

Directions

Take two (2) capsules daily, preferably with meals.

Presentation

Contains 48 capsules, 890 mg each. Total weight: 42,72 g (1.51 oz)

Warnings

Food supplement based on chondroitin and glucosamine.

Food supplements should not be used as a substitute for a balanced diet. Do not exceed the expressly recommended daily dose. Keep out of the reach of younger children. Store in a cool, dry place. It should not be consumed by pregnant or breastfeeding women, children or teenagers.

Additional Information

Chondroitin from Marine origin

Chondroitin is found in animal cartilage, but not all forms have the appropriate molecular weight to be

rapidly absorbed in the gastro-intestinal tract. Drasanvi uses Chondroitin from marine origin, which has a low molecular weight (50-10.000 Da) and can easily cross the intestinal wall and become bioavailable before being decomposed in the large intestine.

Vegetable capsules

Our capsules are vegetable-based. They are manufactured from Hydroxypropyl Methylcellulose, which is a product derived from plant cellulose. These capsules have been certified by the Vegetarian Society.

Allergen-free

We make every effort to ensure that our Chondroitin and Glucosamine capsules are free of the most common allergens except fish, which is the raw material used for these supplements.

Blister packs

Our Chondroitin and Glucosamine capsules come in blister packs. Blister packs protect products against adverse external influences that may affect its quality or potency (such as mechanical damage and environmental factors like moisture or biological contamination), ensuring their composition for extended periods of time.
