

# St. John's Wort Glycerinate 50 ml Botanical Bio Drasanvi

**SKU**: 032050182 **EAN13**: 8436044515019

Description

Hypericum, also called St. John's Wort, is a widely known and used plant in Europe. It has a strongpine smell and when rubbed or crushed it releases a reddish liquid that can stain your hands. Theherb?s common name comes from its traditional flowering and harvesting on St. John's day. This isbecause the most bioactive compounds are observed during the full-flowering stage. We have selected St John's Wort Glycerinate Extract with a 1:23 ratio. This means that for each gram of Extract wehave used 23 grams of fresh plant. Our St John's Wort Glycerinate Extract is titrated in Hypericin 0,033 mg/ml, providing 0,01 mg per day.

### Ingredients

St John's Wort BIO Glycerinate Extract\* (Hypericum perforatum. Ratio 1:23, Hypericin 0,033 mg/ml) 3 ml

**Directions** Presentation

Take 1 ml (approximately 28 drops) diluted in a glass of water three times a day, preferably before main meals.

Contains 50 ml (1.75 fl oz)

### Warnings

Due to its BIO nature (it does not contain preservatives), close tightly and refrigerate after opening. Once opened consume before one month. Food supplements should not be used as a substitute for a balanced diet. Do not exceed the expressly recommended daily dose. Keep out of the reach of younger children. Store in a cool, dry place.

### Additional Information

#### **Standardized Extracts**

One of the primary advantages of our formulation is the use of standardized extracts. This means that

the active plant ingredients that provide medicinal properties are always the same. In the case of St John's Wort, its titration in Hypericin ensures a constant daily dose of 0,01mg. In addition, we have selected a St John's Wort glycerinated extract with a ratio 1:23. This means that for each gram of extract we have used 23g of plant.

#### **Glycerinate Extracts**

The advantages of vegetable glycerinate based extracts with respect to other solvents like water or alcohol are as follows:

- The active plant ingredients are not affected.
- Vegetable glycerin promotes the homogeneous distribution of active ingredients throughout the product.
- Vegetable glycerin delays oxidation; therefore preservatives are not needed.
- Vegetable glycerin is the only solvent that preserves the natural flavor derived from the plant.
- Glycerin has a low glycemic index and therefore breaks down sugars slowly. This way, we avoid blood sugar spikes.
- Vegetable glycerin is a natural humectant that absorbs moisture. This property facilitates cellular dehydration without damaging the overall plant protein structures.

### **Organic Certification**

Our St John's Wort Extract is certified organic. This certification ensures that our crops are grown, harvested and processed under the most strict certification standards. The absence of chemical additives preserves the properties of the native plant.

#### **High Quality Bottle**

Drasanvi has chosen to use a special glass bottle. This is an opaque bottle, characterized by preventing the passage of visible light spectrum. This protects the products from oxidation, so our glycerinated extracts are kept in perfect condition for longer periods of time.
