

Boldo Glycerinate 50 ml Botanical Bio Drasanvi

SKU: 032050185 EAN13: 8436044515033

Description

Boldo, a tree of the family Monimiaceae, is natively endemic to South America and grows in indigenous and temperate areas across the Andean regions of Chile and Argentina and in the southern mountain range of Peru. From pre-Columbian times, the fruit of this tree has been eaten either raw or cooked. Both, bark and leaves are used. Boldo is rich in Essential Oils such as Cineole, Eucalyptol and Ascaridiol, as well as Flavonoids and Tannins. We have selected a Boldo Glycerinate Extract with a 1:5 ratio. This means that for each gram of Extract we have used 5 grams of fresh plant. Besides, our Boldo Glycerinate Extract is titrated in Boldine 0,5 mg/ml, providing 1.5 mg per day.

Ingredients

Boldo BIO Glycerinated Extract* (*Peumus boldus* Molina, Ratio 1:5, Boldine 0,5 mg / ml) 3 ml

Directions

Take 1 ml (approximately 28 drops) diluted in a glass of water three times a day, preferably before main meals

Presentation

Contains 50 ml (1.75 fl oz).

Warnings

Due to its BIO nature (it does not contain preservatives), close tightly and refrigerate after opening. Food supplements should not be used as a substitute for a balanced diet. Do not exceed the expressly recommended daily dose. Keep out of the reach of younger children. Store in a cool, dry place.

Additional Information

Standardized Extracts

One of the primary advantages of our formulation is the use of standardized extracts. This means that the active plant ingredients that provide medicinal properties are always the same. In the case of Boldo, its titration in Boldine ensures a constant daily dose of 1.5 mg. In addition, we have selected a

Boldo glycerinated extract with a ratio 1:5. This means that for each gram of extract we have used 5g of plant.

Glycerinate Extracts

The advantages of vegetable glycerinate based extracts with respect to other solvents like water or alcohol are as follows:

- The active plant ingredients are not affected.
- Vegetable glycerin promotes the homogeneous distribution of active ingredients throughout the product.
- Vegetable glycerin delays oxidation; therefore preservatives are not needed.
- Vegetable glycerin is the only solvent that preserves the natural flavor derived from the plant.
- Glycerin has a low glycemic index and therefore breaks down sugars slowly. This way, we avoid blood sugar spikes.
- Vegetable glycerin is a natural humectant that absorbs moisture. This property facilitates cellular dehydration without damaging the overall plant protein structures.

Organic Certification

Our Boldo Glycerinated Extract is certified organic. This certification ensures that our crops are grown, harvested and processed under the most strict certification standards. The absence of chemical additives preserves the properties of the native plant.

High Quality Bottle

Drasanvi has chosen to use a special glass bottle. This is an opaque bottle, characterized by preventing the passage of visible light spectrum. This protects the products from oxidation, so our glycerinated extracts are kept in perfect condition for longer periods of time.
