

Echinacea Glycerinate 50 ml Botanical Bio Drasanvi

SKU: 032050192 EAN13: 8436044515064

Description

Echinacea is a flowering plant found in meadows in temperate zones. Flowers are big and conic and have very big strap-shaped ligules. Echinacea is rich in Alkylamides, B vitamins, Beta-carotenes, Vitamin C, Iron, Magnesium, Sodium and Flavonoids. We have selected an Echinacea Glycerinate Extract with a 1:20 ratio. This means that for each gram of Extract we have used 20 grams of fresh plant. Our Echinacea Glycerinate Extract is titrated in Echinoides Acid 13 mg/ml, providing 39 mg per day.

Ingredients

Echinacea BIO Glycerinate Extract* (*Echinacea purpurea*. Ratio 1:20 Echinoides 13 mg/ml) 3 ml

Directions

Take 1 ml (approximately 28 drops) diluted in a glass of water three times a day, preferably before main meals.

Presentation

Contains 50 ml (1.75 fl oz).

Warnings

Due to its BIO nature (it does not contain preservatives), close tightly and refrigerate after opening. Once opened consume before one month. Food supplements should not be used as a substitute for a balanced diet. Do not exceed the expressly recommended daily dose. Keep out of the reach of younger children. Store in a cool, dry place.

Additional Information

Standardized Extracts

One of the primary advantages of our formulation is the use of standardized extracts. This means that the active plant ingredients that provide medicinal properties are always the same. In the case of Echinacea, its titration in Echinoides Acid ensures a constant daily dose of 39mg. In addition, we have selected an Echinacea glycerinated extract with a ratio 1:20. This means that for each gram of extract we have used 20g of plant.

Glycerinate Extracts

The advantages of vegetable glycerinate based extracts with respect to other solvents like water or alcohol are as follows:

- The active plant ingredients are not affected.

- Vegetable glycerin promotes the homogeneous distribution of active ingredients throughout the product.
- Vegetable glycerin delays oxidation; therefore preservatives are not needed.
- Vegetable glycerin is the only solvent that preserves the natural flavor derived from the plant.
- Glycerin has a low glycemic index and therefore breaks down sugars slowly. This way, we avoid blood sugar spikes.
- Vegetable glycerin is a natural humectant that absorbs moisture. This property facilitates cellular dehydration without damaging the overall plant protein structures.

Organic Certification

Our Echinacea Glycerinated Extract is certified organic. This certification ensures that our crops are grown, harvested and processed under the most strict certification standards. The absence of chemical additives preserves the properties of the native plant.

High Quality Bottle

Drasanvi has chosen to use a special glass bottle. This is an opaque bottle, characterized by preventing the passage of visible light spectrum. This protects the products from oxidation, so our glycerinated extracts are kept in perfect condition for longer periods of time.
