

Ginkgo Glycerinate 50 ml Botanical Bio Drasanvi

SKU: 032050196 EAN13: 8436044515125

Description

Ginkgo (*Ginkgo biloba*) is a unique tree as it is the sole survivor of the order Ginkgoales, a group of gymnosperms comprising the Ginkgoaceae family that dates back to the Jurassic period (270 million years ago). Ginkgo has been used for centuries in Chinese, Japanese, and Hindu traditional medicine. This tree is rich in Flavonol Glycosides and Lactones. We have selected a Ginkgo biloba Glycerinate Extract with a 1:24 ratio. This means that for each gram of Extract we have used 24 grams of fresh plant. Our Ginkgo biloba Glycerinate Extract is titrated in Flavonol Glycosides 5 mg/ml, providing 15 mg per day.

Ingredients

Ginkgo BIO Glycerinate Extract* (*Leaf*) (*Ginkgo biloba*. Ratio 1:24, Flavonol Glycosides 5 mg/ml) 3 ml

Directions

Take 1 ml (approximately 28 drops) diluted in a glass of water three times a day, preferably before main meals.

Presentation

Contains 50 ml (1.75 fl oz).

Warnings

Due to its BIO nature (it does not contain preservatives), close tightly and refrigerate after opening. Once opened consume before one month. Safety Warning: Please, consult a healthcare provider if you are simultaneously taking anticoagulant drugs. Food supplements should not be used as a substitute for a balanced diet. Do not exceed the expressly recommended daily dose. Keep out of the reach of younger children. Store in a cool, dry place.

Additional Information

Standardized Extracts

One of the primary advantages of our formulation is the use of standardized extracts. This means that

the active plant ingredients that provide medicinal properties are always the same. In the case of Ginkgo Biloba, its titration in Flavaonol Glicosides ensures a constant daily dose of 15mg. In addition, we have selected a Ginkgo Biloba glycerinated extract with a ratio 1:24. This means that for each gram of extract we have used 24g of plant.

Glycerinate Extracts

The advantages of vegetable glycerinate based extracts with respect to other solvents like water or alcohol are as follows:

- The active plant ingredients are not affected.
- Vegetable glycerin promotes the homogeneous distribution of active ingredients throughout the product.
- Vegetable glycerin delays oxidation; therefore preservatives are not needed.
- Vegetable glycerin is the only solvent that preserves the natural flavor derived from the plant.
- Glycerin has a low glycemic index and therefore breaks down sugars slowly. This way, we avoid blood sugar spikes.
- Vegetable glycerin is a natural humectant that absorbs moisture. This property facilitates cellular dehydration without damaging the overall plant protein structures.

Organic Certification

Our Ginkgo Biloba Glycerinated Extract is certified organic. This certification ensures that our crops are grown, harvested and processed under the most strict certification standards. The absence of chemical additives preserves the properties of the native plant.

High Quality Bottle

Drasanvi has chosen to use a special glass bottle. This is an opaque bottle, characterized by preventing the passage of visible light spectrum. This protects the products from oxidation, so our glycerinated extracts are kept in perfect condition for longer periods of time.
