

Devil's Claw Glycerinate 50 ml Botanical Bio Drasanvi

SKU: 032050198 EAN13: 8436044515217

Description

Devil's claw (*Harpagophytum procumbens*) is a plant with dentate leaves and deep roots that gets its name from the appearance of its fruit, which is covered with hooks meant to attach onto animals fur. Its properties have been known by many civilizations, including the Bushmen that have used the plant for hundreds of years. In 1960 it arrived to Europe, where it has been widely used ever since. We have selected a Devil's claw Glycerinate Extract with a 1:3 ratio. This means that for each gram of Extract we have used 3 grams of fresh plant. Our Devil's claw Glycerinate Extract is titrated in Harpagosides 3.6 mg/ml, providing 10,8 mg per day.

Ingredients

Devil's claw BIO Glycerinate Extract* (*Harpagophytum procumbens* DC. Ratio 1:3, Harpagosides 3,6 mg) 3 ml

Directions

Take 1 ml (approximately 28 drops) diluted in a glass of water three times a day, preferably before main meals.

Presentation

Contains 50 ml (1.75 fl oz).

Warnings

Due to its BIO nature (it does not contain preservatives), close tightly and refrigerate after opening. Once opened consume before one month. Food supplements should not be used as a substitute for a balanced diet. Do not exceed the expressly recommended daily dose. Keep out of the reach of younger children. Store in a cool, dry place.

Additional Information

Standardized Extracts

One of the primary advantages of our formulation is the use of standardized extracts. This means that

the active plant ingredients that provide medicinal properties are always the same. In the case of Devil's Claw, its titration in Harpagosides ensures a constant daily dose of 3.6mg. In addition, we have selected a Devil's Claw glycerinated extract with a ratio 1:3. This means that for each gram of extract we have used 3g of plant.

Glycerinate Extracts

The advantages of vegetable glycerinate based extracts with respect to other solvents like water or alcohol are as follows:

- The active plant ingredients are not affected.
- Vegetable glycerin promotes the homogeneous distribution of active ingredients throughout the product.
- Vegetable glycerin delays oxidation; therefore preservatives are not needed.
- Vegetable glycerin is the only solvent that preserves the natural flavor derived from the plant.
- Glycerin has a low glycemic index and therefore breaks down sugars slowly. This way, we avoid blood sugar spikes.
- Vegetable glycerin is a natural humectant that absorbs moisture. This property facilitates cellular dehydration without damaging the overall plant protein structures.

Organic Certification

Our Devil's Claw Glycerinated Extract is certified organic. This certification ensures that our crops are grown, harvested and processed under the most strict certification standards. The absence of chemical additives preserves the properties of the native plant.

High Quality Bottle

Drasanvi has chosen to use a special glass bottle. This is an opaque bottle, characterized by preventing the passage of visible light spectrum. This protects the products from oxidation, so our glycerinated extracts are kept in perfect condition for longer periods of time.
