

Moringa 60 Capsules Nutr basics Drasanvi

SKU: 032050210 EAN13: 8436044515903

Description

Moringa is an ancient tree and a native of the Himalayas in India, whose cultivation has spread to Africa and even South America. It is curious that this tree can be consumed, all its parts: roots, leaves, fruits... Due to its composition and properties, the part chosen for the preparation of our capsules are the leaves, which is why, thanks to the richness of its active ingredients, it helps maintain blood glucose levels.

Ingredients

Moringa Dry Extract (*Leaf*) (*Moringa oleifera* Lam.) (Ratio 4:1) providing Flavones (3%) and Polyphenols (5%) 700 mg, Casing (*Hydroxypropyl Methylcellulose*) , Bulking Agent (*Microcrystalline Cellulose*) , Bulking Agent (*Magnesium Stereate*) , Anti-caking Agent (*Silicon Dioxide*)

Directions

Take one (1) capsule twice daily, before breakfast and lunch.

Presentation

Contains 60 capsules, 486 mg each. Total weight: 29,2 g (1.02 oz)

Warnings

Food supplement based on plants.

Food supplements should not be used as a substitute for a balanced diet. Do not exceed the expressly recommended daily dose. Keep out of the reach of younger children. Store in a cool, dry place. Do not consume by pregnant women, or children under 18 years of age.

Additional Information

Dry Extracts

We have selected a Moringa Dry Extract with a 4:1 ratio. This means that we have used 1400 mg of plant to produce 350 mg of extract. “Dry extract” refers to a specific extraction process that retains the bioactive compounds from plant materials and eliminates impurities and other unnecessary substances. The use of plant extracts has several advantages over the use of powdered forms:

- **Standardized Extracts.** The bioactive compounds content can be accurately measured.
- **Concentrated and easy to take doses.** Products based on plant extracts are more concentrated than those made from powdered plant material.
- **Pure bioactive compounds.** The assimilation of bioactive compounds is easier if they are

isolated (extract form) rather than in combination with the rest of plant material that retains impurities and fiber (powdered form).

Standardised Extracts

Another important advantage of our product formulation is the use of standardised extracts. Standardised extracts contain isolated, guaranteed amounts of bioactive ingredients that remain constant over time. In this particular case, our Moringa Extract is titrated in total Flavonoids and Polyphenols, ensuring a constant daily dose of 17.5 mg and 35 mg, respectively.

Concentrated and easy to take doses

The use of concentrated and titrated dry extracts allows for the delivery of the same amount in just one (1) dose.

Vegetable-based capsules

Our capsules are vegetable-based. They are manufactured from Hydroxypropyl Methylcellulose, which is a product derived from plant cellulose. These capsules have been certified by the Vegetarian Society.

Free from Allergens

We make every effort to ensure that our Moringa capsules are free of the most common allergens, in particular gluten

Blister Packs

Our Moringa capsules come in blister packs. Blister packs protect products against adverse external influences that may affect its quality or potency (such as mechanical damage and environmental factors like moisture or biological contamination), ensuring their composition for extended periods of time.
