

## L-Carnitine 3000 mg Vials 24x25 ml Sport Live Drasanvi

SKU: 032050362 EAN13: 8436044518577

### Description

L-Carnitine is a molecule synthesized by the body from Lysine and Methionine. L-Carnitine is required for the transport of fatty acids into the muscular cells, specifically into the mitochondria, where fatty acids are used to produce energy. Hence, Carnitine is a key supplement for athletes. Drasanvi has gone one step further by adding Coenzyme Q10 to the formula. Coenzyme Q10 is a substance, similar to vitamins, that mediates a myriad of enzymatic processes in the body.

## Ingredients

---

Water , L-Carnitine 1.500 mg, Acetyl L-Carnitine 1.500 mg, Ubiquinol Coenzyme Q10 30 mg, Flavour (*Lemon Flavour*) , Preservative (*Potassium Sorbate*) , Acid (*Citric Acid*) , Sweetener (*Sucralose*)

## Directions

---

Take one (1) vial of L-Carnitine before training or working out.

## Presentation

---

Vial with 25 ml

## Warnings

---

Food supplement based on L-carnitine and coenzyme Q10 with sweetener. Do not exceed the expressly recommended daily dose; Food supplements should not be used as a substitute for a balanced diet; Keep out of the reach of little kids. Store in a cool, dry place.

## Additional Information

---

### **Simultaneous use of two different sources of L-Carnitine**

There is some controversy about which form of Carnitine is the most beneficial for the body: L-Carnitine or L-AcetylCo-A. Recent studies have shown that both forms respond to different goals and differ in terms of absorption and metabolism. Thus, while L-Carnitine is better assimilated by the body, L-AcetylCo-A provides a faster response. Regardless, both sources of Carnitine increase the levels of endogenous L-Carnitine and L-Carnitine esters.

### **Coenzyme Q10 in form of Ubiquinol**

Coenzyme Q10 (CoQ10) is a substance similar to vitamins that mediates a myriad of enzymatic processes throughout the body. There are two ways to add Coenzyme Q10: in the form of Ubiquinol and in the form of Ubiquinone. Ubiquinone is better known than Ubiquinol because it is the most common form in which Coenzyme Q10 is marketed. Ubiquinone is the fully oxidized form of CoQ10.

When taken, this supplement is metabolized inside the body where it becomes Ubiquinol. Ubiquinol is more potent as it is taken directly.

### **Suitable for vegetarians**

Our amino acids are extracted from plant-based foods and are suitable for vegetarians and vegans.

### **Convenient packaging**

Our L-Carnitine is commercialized in vials that can be transported and consumed anywhere you go.

### **Free from Allergens and Other Contaminants**

Our rigorous manufacturing system and quality control processes ensure that our products are free from allergens and other food contaminants. We fully guarantee our products.

### **No Doping**

High-quality sports and a healthy lifestyle is our motto. As a result, we strictly adhere to stringent labeling norms. In addition, the rigorous quality controls that our raw materials and manufacturing processes undergo ensure the safe use of our supplements in sports.

## Allergen Information

---

Allergen-free
