

Collmar 180 Chewable Tablets Chocolate Cookie Flavour Drasanvi

SKU: 032050377 EAN13: 8436044519475

Description

Our Collmar line continues to grow, this time incorporating chewable tablets chocolate cookie flavour with a new formulation that facilitates the intake. In this way, you can bite or slowly undo the tablets in your mouth, providing all the benefits of Collmar at any time of the day. A refreshing flavour will accompany your new Collmar, with Enzymatically Hydrolysed Marine Collagen, Hyaluronic Acid, Magnesium and Vitamin C, which contributes to the normal formation of Collagen for the normal functioning of cartilage, bones and skin.

Ingredients

Hydrolysed Marine Collagen (Contains fish) (Type I, very low molecular weight) 3.900 mg, Bulking Agent (Isomaltose), Magnesium Oxide (Magnesium 58%) 562,5 mg, Flavour (Cookie Flavour), Defatted Cocoa, Bulking Agent (Magnesium salt of fatty acid), Acerola Dry Extract (Fruit) (*Malpighia punicifolia*, with 25% in Vitamin C) 80 mg, Anti-caking Agent (Silicon Dioxide), Sweetener (Sucralose), Hyaluronic Acid 10,02 mg

Directions

Take 6 tablets throughout the day. Swallow once chewed or dissolve directly in the mouth.

Presentation

Contains 180 chewable tablets of 1.090 mg each. Net weight: 196 g (7.05 oz)

Warnings

Food supplement based on collagen, plants and minerals with sweetener.

Food supplements should not be used as a substitute for a balanced diet. Do not exceed the expressly recommended daily dose. Keep out of the reach of little kids. Store in a cool, dry place. Excessive consumption can produce laxative effects. Contains fish.

Additional Information

Marine Collagen and the Richness of Amino Acids

We use Collagen from fish. A recent study (J Agric Food Chem 55(4) 1532-1535 (2007)) has shown that **Marine Collagen is more easily assimilated by the body** than Collagen from other sources, like pig Collagen. Collmar® is rich in Glycine, Proline and Hydroxyproline, the most abundant amino acids in collagen, and essential amino acids.

Chewable tablets to break up in the mouth

In this way the intake is easier for people who have difficulty swallowing tablets.

Enzymatically Hydrolysed

Collmar® Marine Collagen has been subjected to a unique process of enzymatic hydrolysis, in which it is broken down into smaller molecules, called Peptides, so that they can be more easily assimilated by the organism.

Enriched with Hyaluronic Acid and Vitamin C

Collmar® is enriched with Hyaluronic Acid, which comes from bacterial fermentation of *Streptococcus zooepidemicus*, and Vitamin C. The EFSA (European Food Safety Authority) recommends the consumption of Vitamin C, since it **contributes to the formation of collagen**.

With Magnesium

The daily dose of 6 tablets, contributes 61% of Magnesium. Magnesium is an essential mineral that, among other functions, **contributes to the maintenance of bones and muscles** under normal conditions, as well as normal protein synthesis.

No presence of terrestrial animals

All the ingredients used (Marine Collagen and Hyaluronic Acid) do not come from terrestrial animals.
