Should not be taken by children, during pregnancy or whilst breast feeding. If you are taking other anticoagulants please consult your doctor. Contains soya. Food supplements should not be used as a substitute for a balanced diet. Do not exceed the expressly recommended daily dose. Keep out of the reach of younger children. Store in a cool, dry place. Food supplements should not be used as a substitute for a balanced diet. Do not exceed the expressly recommended daily dose. Keep out of the reach of younger children. Store in a cool, dry place.

Additional Information

Highest Quality Royal Jelly

The quantity of hydroxydecanoic acid (10-HDA) found in royal jelly determines its quality as it conserves the jelly, and maintains the properties of the jelly once it has been extracted. It has been established that good royal jelly should contain at least 3% of 10-HDA. Vitalpur® Study includes in its

formulation a royal jelly that has minimum 4-5% of 10-HDA.

Stevia sweetener

Stevia is a plant rich in glucosides, and 300 times sweeter than sugar. The glucosides from this plant do not affect the levels of glucose in the blood.
