

Saffron 30 Capsules Nutrabasics Drasanvi

SKU: 032057054 EAN13: 8436578549351

Description

Ingredients

Bulking agent (*Microcrystalline cellulose*) , Coating agent (*Hydroxypropyl methylcellulose*) , Bulking agent (*Magnesium salt of fatty acid*) , Saffron stigma dry extract (*Crocus sativus L. with contribution in safranal 2%*) *From extracts with scientific studies Safr'inside™*) 30 mg, Anti-caking agent (*Silicon dioxide*)

Directions

Take one capsule a day. It is advisable to take the capsule in the morning.

Presentation

Contains 30 capsules of 426 mg. Net Weight: 12,78 g (0.45 oz)

Warnings

Food supplement based on plants.

Do not exceed the expressly recommended daily dose. Food supplements should not be used as a substitute for a balanced diet. Keep out of the reach of little kids. Store in a cool, dry place.

Additional Information

Used in the form of dry extract

In our saffron capsules we use dry extracts, instead of powdered plant. The extract presentation allows the product to be concentrated, which makes it possible to obtain the same result using less quantity. We have chosen a 5: 1 Saffron extract, which means that 150 mg of the plant have been used to obtain 30 mg of our extract. The mention of "dry extract" refers to a specific extraction process, in which the active principles of interest are maintained and impurities and other substances not interesting for this purpose are eliminated. The use of plant extracts has several advantages over the use of powdered plants:

- The content of active principles (standardized extracts) can be precisely known.

- Products based on plant extracts are more concentrated than those made from total plant powder (concentrated dose and easy to take).
- The assimilation of the active principles alone is easier than the assimilation of all the compounds of a plant.

Standardized extracts

Another of the most important advantages in our formulation is the use of standardized extracts. This means that the plant provides active principles (also called plant strength) constant over time. In the case of saffron extract, it is titrated in safranal, ensuring that 0.6 mg per daily dose is always provided.

It also comes from a Safr'inside registered extract with numerous scientific studies.

Allergen free

Saffron capsules are made so that there is no contamination with any of the most frequent allergens, among which we highlight gluten.

Vegetable capsules

The capsules used are of vegetable origin, specifically they are made of hydroxypropylmethylcellulose. These capsules are certified by the Vegetarian Society. Hydroxypropyl methylcellulose is obtained from the cellulose of various plant structures.

Conditioned in blister

Saffron capsules are presented in a container called blister: The blisters protect the product from impacts and environmental effects in order to ensure its composition over time. The use of these materials, compared to other presentations, protects it from moisture and microbial contamination.
