

Collmar Essentials Antiage 60 Tablets Drasanvi

SKU: 032057434 EAN13: 8436601105363

Description

With age, the production of collagen and hyaluronic acid naturally decreases. These molecules are present mainly in the skin, specifically at the joint level and in other connective tissues.

Drasanvi has developed a unique formula based on essential active ingredients for the well-being of the body, with anti-aging benefits on connective tissues.

Ingredients

Enzymatically Hydrolysed Marine Collagen (CONTAINS FISH Type I, very low molecular weight)

750 mg, **Bulking agent** (Microcrystalline cellulose) , Hyaluronic acid 200 mg, Coenzyme Q10 50 mg, Everlasting Dry Extract (Flower) (*Helichrysum arenarium* (L), vitexin 3%) 50 mg, Manganese sulphate (Manganese 32 %) 6,25 mg, Selenomethionine (Selenium 0,5%) 10 mg, Bulking agent (Fatty Acid Magnesium Salt)

Directions

Take 2 tablets a day accompanied by a glass of water, before breakfast.

Recommended duration: 3 months

Presentation

Contains 60 tablets of 900 mg. Total weight: 54 g (1.9 oz)

Warnings

Food supplement based on hydrolysed marine collagen, hyaluronic acid, Coenzyme Q10. plant and mineral extracts.

Food supplements should not be used as a substitute for a varied and balanced diet and a healthy lifestyle. Do not exceed the expressly recommended daily dose. Keep out of the reach of little kids. Store in a cool, dry place. Contains FISH.

Additional Information

As we go through life, our body undergoes natural changes. Among them is the reduction in the production of collagen, hyaluronic acid and other essential components. These substances are essential to maintain optimal balance in our body. Drasanvi has developed a unique formula that combines hyaluronic acid, collagen, Coenzyme Q10 and minerals, providing a beneficial contribution to the general well-being of the body.

Marine Collagen and the richness of Amino Acids

The Collagen used comes from fish. A recent study (J Agric Food Chem 55(4) 1532-1535 (2007)) has shown that **Marine Collagen is more easily assimilated than other sources** of Collagen, such as porcine. Collmar® has a high percentage of Glycine, Proline and Hydroxyproline (major amino acids of collagen) and essential amino acids.

Enzymatically Hydrolysed

Collmar® Marine Collagen has been subjected to a unique enzymatic hydrolysis process, which consists of fragmenting the Collagen into smaller molecules, called peptides, so that they are more easily assimilated by the body.

Enriched with Hyaluronic Acid

Collmar® is enriched with Hyaluronic Acid, which comes from bacterial fermentation of *Streptococcus zooepidemicus*.

Free of terrestrial animals

All ingredients used (Marine Collagen and Hyaluronic Acid) do not come from land animals.

With Magnesium

Magnesium contributes to the maintenance of bones in normal conditions

No sugar, no fat and no cholesterol.
