---

Apply directly on the cleaned skin, and massage lightly until it has been fully absorbed.

## Presentation

---

Contains 200 ml (7 oz)

## Cosmetic Table

---

COMPONENT	ACTION	EFFECT
Aloe Barbadensis Miller	This is the most effective natural regenerative substance that there is. Any skin problem can be treated with Aloe Vera, which will speed up the healing process because it penetrates the skin 8 times more deeply than any other regenerative substance.	Highly regenerative for damaged tissue. It also stimulates the immune system simultaneously and helps in the production of fibroblast cells, fundamental during the healing process.
Vitamin E	Helps regenerate tissue and stimulates cellular metabolism and maintains a healthy level of fat in cells. It is a powerful defence against free radicals. It also repairs cells damaged by the sun.	Antioxidant, which helps against free radicals.
Melaleuca Alternifolia (Tea Tree)	Used in the process of making essential oils for its antibacterial and antifungal properties.	Useful to fight against skin and nail infections caused by fungal growth (such as athlete's foot), insect bites, dandruff and acne.

## Warnings

---

Our Aloe Vera gel is of the highest quality. It contains a high concentration of polysaccharides, enzymes and trace elements. Its properties and our production process enable us to meet the standards established by the IASC (International Aloe Science Council). This product is enriched with tea tree oil, obtained by steam distillation, which contains high quantities of terpenes. Cosmetic product. Do not eat. External use. Avoid direct contact with your eyes. Free from perfumes, parabenes and artificial colourings. Not tested on animals. Keep out of the reach of children. Store in a cool, dry

place.
