INCI

AQUA, DIMETHYL SULFONE, C12-20 ACID PEG-8 ESTER, OLEIC ACID, PARAFFINUM LIQUIDUM, CAPRYLIC/CAPRIC TRIGLYCERIDE, CETYL ALCOHOL, UREA, LANOLIN, GLUCOSAMINE SULFATE, DIMETHICONE, PROPYLENE GLYCOL, EUGENIA CARYOPHYLLUS BUD OIL,

EUGENOL, TOCOPHERYL ACETATE, ARNICA MONTANA FLOWER OIL, PHENOXYETHANOL, SODIUM CHONDROITIN SULFATE, DMDM HYDANTOIN, CAPSICUM FRUTESCENS RESIN, BENZYL SALICYLATE, SALIX ALBA BARK EXTRACT, SYMPHYTUM OFFICINALE ROOT EXTRACT, HARPAGOPHYTUM PROCUMBENS ROOT EXTRACT, ARNICA MONTANA FLOWER EXTRACT, LIMONENE, ISOEUGENOL, LINALOOL

Directions

Massage gently into the affected areas until it has been fully absorbed. Apply two or more times a day.

Presentation

Contains 200 ml (7 fl oz)

Cosmetic Table

Ingredient	Use	Effect
Chilli	Stimulates the heat and pain receptors in the epidermis thus causing a more intense blood supply.	Has the ability to cross the cell wall of pain neuron receptors (thereby preventing any kind of pain) without affecting the operation of other neurons. Therefore it can be used as an anaesthetic as it does not bring about numbing
Comfrey	Promotes wound healing and reduces bleeding due to its richness in allantoin	Allantoin has a healing affect and acts as a moisturizer and an anti-inflammatory ingredient
Chondroitin sulphate	Helps to slow down and prevent the deterioration of cartilage	Inhibits the action of destructive enzymes, and slows the progression of osteoarthritis. It relieves pain and other symptoms, and when taken with glucosamine may even encourage regrowth of damaged cartilage
Glucosamine sulphate	Stimulates the production of substances necessary for healthy joints; supports and corrects joint repair.	This is a precursor of the natural substance glucosamine, which is produced from an amino acid glutamine and sugar. It is needed to produce vital molecules to help connect cells and tissue.
Devil's claw	Helps reduce joint pain.	Effective in treating osteoarthritis of the spine, hip, knee and back pain by reducing inammation and as well as rheumatic pain.

Butcher's broom	Promotes blood circulation and is a powerful venous tonic	It contains essential oils, resin, potassium salts and two saponins: ruscogenin and neoruscogenina. It also has steroidal, anti-swelling and anti-inflammatory properties
Methylsulfonylmethane	This is a natural source of sulphur, which is a mineral element essential for the normal functioning of our body	Sulphur is important for proteins and for the connective tissue that make up muscle mass; for the enzymes that bring about chemical reactions; and for the many natural compounds that protect against toxins and oxidative stress
Arnica	It has pain-relieving and anti-inflammatory properties and reduces swelling	Helps reduce bruising, sprains, muscle aches, strains, and arthritis through its pain-relieving properties.
Clove	Contains ingredients that reduce pain	Pain-relieving properties.

Warnings
